“Important News for Solvent Ink Jet Printers”

**INTELICOAT TECHNOLOGIES ANNOUNCES MAGICLEE® VERONA™
DIGITAL FINE ART PAPERS ARE NOW QUALIFIED FOR SOLVENT PRINTERS**

South Hadley, Mass., January 19, 2006 – Intelicoat Technologies announces that its Magiclée® Verona™ digital fine art papers are newly qualified for use in solvent printers. According to Ed McCarron, marketing manager for digital imaging, “We are delighted to add Magiclée Verona fine art papers to our offerings of cross-platform substrates that can perform on both water-based and solvent printers. Not only does this open up new, value-added applications beyond vinyl for owners of solvent ink jet printers, but it also offers flexibility to both distributors and to end-users with multiple printer platforms.”

The Magiclée digital fine art and photo media product line complements the highly acclaimed Magic® brand of wide format water-based and solvent ink jet media lines which were early entrants into the digital imaging arena. The Verona papers are available in 225, 285 and 335 gsm weights. The 225 and 335 products are 100% cellulose; the Arches® by Magiclée® 285 gsm products are smooth or textured 100% cotton linter, mould-made papers.

Intelicoat combines state-of-the-art ink jet technology with years of experience in the digital imaging market. As a pioneer of ink jet coatings, Intelicoat has the experience, manufacturing capabilities, technical expertise, and product knowledge to deliver consistent, reliable, high quality products that the artistic and photo markets demand. McCarron adds, “We are pleased to be able to continue to add cross-platform products that perform in both water-based and solvent environments to our Magic and Magiclée brands of digital imaging media.”

By visiting Intelicoat’s brand website, www.magicinkjet.com, you can obtain printer-to-media compatibility information, new product announcements, product application tips, technical assistance, a list of authorized resellers, as well as make requests for FREE samples of the latest additions to the Magiclée line.

###

The Magiclée® brand consists of an array of digital imaging media products for use in digital fine art and photographic applications manufactured and marketed globally by Intelicoat Technologies, a world leader in the manufacture of coated paper, film and specialty substrates for imaging and electronic technologies. The company's products include: imaging substrates for graphics, desktop, proofing, design engineering applications and information storage; electronic films for applications in printed wiring boards, flexible circuits; optical films for displays; high temperature, conductive and shielding tapes; conductive films; and microfilm. Intelicoat operates four manufacturing facilities in the United States and Europe, with sales and marketing operations in Australia, the Netherlands, the United Kingdom, North and South America. Worldwide headquarters is in South Hadley, Massachusetts, USA. Intelicoat is a Sun Capital Partner company.
